*Our Regional Plan of Conservation and Development*

2017-2027

Endorsed by NHCOCG on \_\_\_\_\_, 2017

## Table of Contents

**I. Plan Purpose & Partners .....1**

**II. Plan Implementation.....2**

**III. Trends Shaping the Region .....3**

**IV. Goals and Strategies .....4**

**V. Regional Conservation & Development Policy Maps..... 13**

**VI. Consistency with State and Local Plans of Conservation & Development ..... 13**

---

### I. Plan Purpose & Partners

- *How can we **attract and retain young people and young families** to our 21-town region?*
- *How can we continue and further improve upon the **high quality of life** we offer to residents of all ages?*
- *How do we balance our need to **conserve land, protect water quality**, and maintain the rural character of our region while also meeting our needs for **housing and jobs**?*

There are thousands of actions we could take to address these issues. The purpose of this Regional Plan of Conservation and Development is to lay out a prioritized, strategic list of actions that we can take together as a region to meet our land use goals over the next 10 years.

To reach our goals we will need to work together and we will need to use our resources strategically. To do this we will ask each of our key partners to endorse the goals and actions proposed in this plan and to commit to working together to implement the plan.

NWCT NEXT

State of Connecticut

## Plan Development Process:

### Analyzed Data and Trends

- In October 2016 we released the *Northwest Hills Regional Profile* which provides demographic, housing, and economic conditions and trends for each of our 21 towns and for the region.

### Collected Input on Regional Goals

- We conducted a web-based resident input survey and collected 1,382 responses from residents in our 21-towns.
- We visited and surveyed each of our member towns' Planning & Zoning Commissions.
- We collected survey responses from 586 high school students.

### Conducted Focus Group Sessions on Action Steps

- Six focus group sessions were held with regional partner agencies, experts in the field, and our town's land use commission members. The purpose of these sessions were to identify actions the COG could take or assist its member towns to take to address core issues:
  - Local food and agriculture (June 2016)
  - Housing (September 2016)
  - Climate & energy (September 2016)
  - Conservation & recreation (November 2016)
  - Jobs & vibrant Main Streets (January 2017)
  - Attracting young people & meeting the needs of an aging population (March 2017)

Assessed where we are

Evaluated where we are heading

Decided where we want to go

Selected strategies for getting us where we want to be

NEXT: carry out actions, track progress, celebrate successes

## II. Plan Implementation

How will we use this plan to meet our regional land use goals?

- This plan will be used to guide the NHCOC's **workplan** and policy positions along with NHCOC's other regional plans including the Regional Transportation Plan.
- We will hold an **annual forum** with our partners to check in on our progress, celebrate our successes, and update our priority actions for the coming year.
- We will develop a **web-based tool kit** to assist our municipalities to implement actions in the Plan including case studies and example regulations.
- We will create a **checklist** for municipalities to use when updating their local plan of conservation and development.

### III. Trends Shaping the Region

Here are some of the key trends shaping land use in the region. These are more fully detailed in the *Northwest Hills Regional Profile* available on our website.

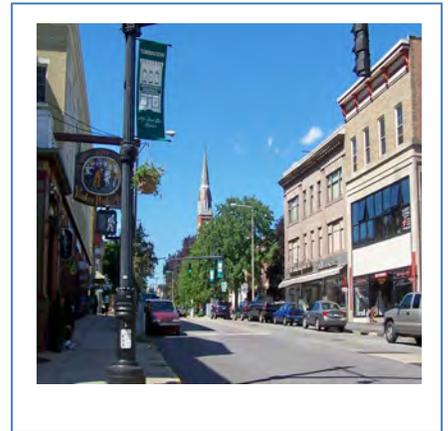

#### Population and demographic trends:

- Our region is losing population. Between 2010 and 2015 we saw a net loss of almost 3,500 residents (3% of our region's total population).
- In the next ten years, the region will see a larger percentage of its population hit retirement age (from 18.2% of the population in 2014 to 28.0% in 2025) and a smaller percentage will be school-aged children (from 20.1% to 17.5%).
- The seasonal or part-time population is estimated at 13% regionally but is as high as 50% in a few towns.

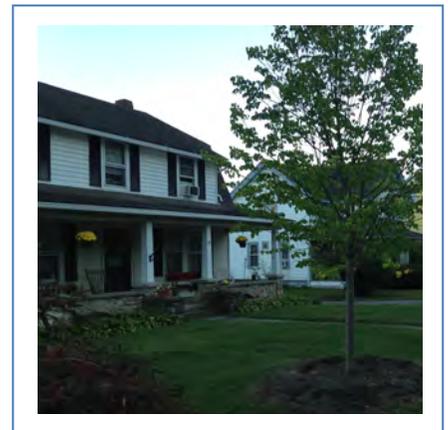

#### Economic trends:

- There was a decrease in the size of the labor force in the region from 2010 to 2014. Torrington remains the region's employment center, just as it is the population center.
- The Health Care and Social Assistance industry is one of the cores of the region's employment, with over 18.0% of jobs. Government and Manufacturing are also important to the region's industry base.
- Over half the businesses in the region are very small (with 4 or fewer employees), and over 15% of the region's workforce is self-employed. There was a decrease in business formation in the region from 2009 to 2015.
- Over 60% of residents commute to jobs outside the region, indicating that the region is serving as a bedroom community for other labor market areas.

#### Housing trends:

- The region has a higher vacancy rate (17%) than the state (9%) as well as a greater share of owner- versus renter-occupied properties. Many of the vacant units are "vacant for seasonal, recreational, or occasional use", otherwise known as second homes.
- Household size has decreased slightly in the region from 2.5 people per household in 2000 to 2.4 people per household in 2014. Smaller household sizes means more housing units are needed to serve the same total number of residents in the region.
- Renters represented 33% of occupied units in the state but only 24% of occupied units in the region. With less rental properties available in the region, young workers may seek housing elsewhere.
- Over one-third of the region's households spend more than 30% of their income on housing costs (16,912 households). Spending more than 30% of your household income on housing costs is considered unaffordable.

## IV. Goals and Strategies

The following conservation and development goals will guide the Northwest Hills Council of Government’s planning and policy work over the next ten years:

1. **Attract and retain young residents**
2. **Protect water quality and natural resources**
3. **Support farm businesses and protect farmland**
4. **Strengthen our town centers and Main Streets**
5. **Meet the needs of our older adult residents**
6. **Continue to foster regional collaboration and resource sharing**

### 1. GOAL: Attract and retain young residents

Our region is losing population. Between 2010 and 2015 we saw a net loss of almost 3,500 residents (3% of our region’s total population). When asked what should be our region’s highest priority goals, attracting and retaining young adults and young families received the most votes from respondents to the Regional Plan survey.

#### POLICIES:

- Facilitate the creation of job, housing, and transportation options desired by young residents.
- Highlight the region’s outdoor recreation assets and amenities/assistance for small business start-ups.
- Create opportunities for robust civic engagement of young residents.
- Develop an on-going program to communicate these opportunities and assets to young people using social media, town and regional websites, and other direct marketing tools.

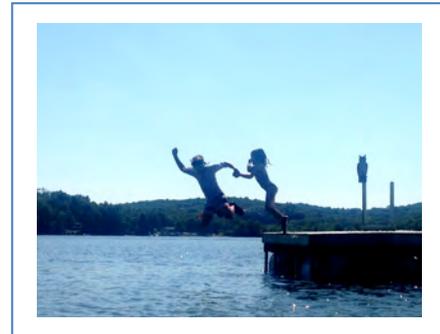

#### ACTIONS:

	Tasks:	Partners:
JOB	1) Facilitate the creation of links from municipal and regional websites to an updated list of <b>job openings</b> in the region. Promoted through social media channels and others focused on young adults. 2) Assist local economic development commissions	NWCT Chamber of Commerce, Northwest Community College,

	<p>with their <b>business retention, expansion and recruitment efforts</b> to create new jobs.</p> <p>3) Update the region’s <b>Comprehensive Development Strategy (CEDS)</b> with a focus on creating/retaining jobs for young residents.</p> <p>4) Support NWCONNect’s efforts to connect every home and business in the region to high speed <b>fiber optic broadband</b> and deploy a distributed mobile antenna system to enhance mobile coverage.</p>	<p>Northwest Regional Workforce Investment Board, NWCONNect, municipal EDCs</p>
HOUSING	<p>1) Provide towns with “best practices” and toolkits on <b>mixed use zoning</b> regulations (housing above commercial) and <b>infill development</b> in town centers and downtowns.</p> <p>2) Continue to support the efforts of local <b>affordable housing</b> organizations to create housing options for young adults and young families in their towns through the Regional Housing Council including apartments in town center areas.</p>	<p>NWCT Regional Housing Council, municipal P&amp;Z</p>
TRANSPORTATION	<p>1) Facilitate the creation of more <b>pedestrian and bike friendly town centers</b> and downtowns through the implementation of the Regional Transportation Plan (RTP). (The RTP includes undertaking a <b>regional bike trail connectivity plan</b>.)</p> <p>2) Better communicate <b>public transit</b> options to young adults 3) Consider the feasibility of a <b>ride sharing</b> type program/service in NWCT (such as those provided through Uber and Lyft)</p>	<p>Municipalities, NW Transit District</p>
RECREATION	<p>1) Continue to develop and promote an interactive <b>online map</b> showing the public access hiking, walking, and multi-use trails in the NHCOCG region.</p> <p>2) Facilitate the creation of additional or promotion of existing organized “pick up” games for teens and young adults</p>	<p>Municipalities</p>
CIVIC AND SOCIAL ENGAGEMENT	<p>1) Provide towns with “best practices” and tools for attracting young residents to town <b>volunteer opportunities</b>. 2) Promote arts, cultural, recreational, and retail activities that create a more vital and visible “<b>nightlife</b>” in our town centers. 3) Create more opportunities for the town’s seniors and young people to come together (Bingo for all!)</p>	<p>Municipalities</p>
COMMUNICATION	<p>1) Facilitate the creation of better channels of communication designed to reach young people about the jobs, housing, transportation, recreation, civic and social engagement opportunities in our region.</p>	<p>Municipalities</p>

## 2. GOAL: Protect water quality and natural resources

Protecting our region’s drinking water, wildlife habitats, prime farmland, lakes and rivers is critically important both to our current residents and to attracting new residents. Sixty-two percent of Regional Plan survey respondents said they would like to see their town and the 21-town region invest in protecting water quality and deal with invasive species in our lakes, streams, and rivers. As our region sees an increase in extreme weather events such as storms and flooding, we will assist our towns to identify vulnerabilities and address them.

### POLICIES:

- Protect water quality and address invasive species in our lakes, rivers, and streams.
- Protect intact forest systems, and public drinking water resource areas from development.
- Support the efforts of water protection organizations such as the Farmington River Coordinating Committee, Farmington River Watershed Association, Housatonic River Commission, Housatonic Valley Association, Northwest Conservation District, Shepaug Bantam River Commission, State Department of Energy and Environmental Protection (DEEP), and water companies as they seek to improve or maintain water quality in the region.
- Support local land trusts in their efforts to protect sizeable areas of contiguous forest habitat, prime farmland, diverse wildlife habitats, and other environmentally sensitive areas.
- Assist the region’s municipalities with identifying and addressing the potential impacts of increased temperatures, storm events, flooding and habitat degradation to increase local and regional resiliency.

### ACTIONS:

<p>WATER QUALITY</p>	<p>1) Continue NHCOC’s <b>Household Hazardous Waste Collection Days</b>, including educational efforts to use less toxic materials. 2) Work with the region’s towns to implement <b>Low Impact Development (LID)</b> or other stormwater management regulations.</p>	<p>Northwest Conservation District, municipalities</p>
<p>NATURAL RESOURCES</p>	<p>1) Increase awareness of the <b>mapping tools</b> available to municipal land use commissions that can assist them in identifying and mitigating potential adverse impacts of proposed development in environmentally sensitive areas 2) Support the <b>mapping of areas of highest conservation need locally</b> in partnership with local land trusts and municipal land use commissions</p>	<p>UConn Center for Land Use Education and Research (CLEAR) – Environmental Conditions Online (ECO), Litchfield Hills Greenprint</p>

<p>ENERGY (Efficiency, conservation, renewable)</p>	<p>1) Provide regional support to <b>local energy task forces</b> by sharing new information and resources, gathering baseline energy usage data, assisting with public information campaigns, and assisting communities with accessing funding for energy initiatives.                  2) Assist our municipalities with participating in <b>SustainableCT</b>, a voluntary, sustainable community certification program that includes a menu of voluntary actions to make communities healthy, safe, resilient, efficient, and livable.                  3) Consider establishing a regional, shared <b>sustainability manager</b> to assist in carrying out the tasks listed here.                  3) Provide example regulations that remove barriers to <b>alternative energy</b> and highlight relevant case studies.</p>	<p>Collaborative SustainableCT, Institute for Sustainable Energy (Eastern CT State Univ.), Clean Water Action Connecticut</p>
<p>CLIMATE ADAPTATION</p>	<p>1) Assist towns with conducting a <b>town-wide vulnerability assessment</b> to identify vulnerabilities and prioritize actions.                  2) Prepare a <b>climate change adaptation plan</b> including a web-based toolkit.                  3) Assist towns with incorporating climate change and resiliency strategies into their <b>POCDs and Natural Hazard Mitigation Plans</b>.                  4) Identify vulnerable populations for heat and extreme weather events; assist social and emergency services in creating a <b>vulnerable populations network</b>, and create a web-based map of cooling centers/emergency shelters.                  5) Coordinate through Road Supervisors, HVA, and CIRCA to make <b>bridges and culverts</b> ready for larger storm events.                  6) Coordinate with FEMA/USGS to update RISK Flood maps</p>	<p>Municipalities, CIRCA, HVA, FEMA</p>

### 3. GOAL: Protect farmland and support farm businesses

Northwest Connecticut has a rich agricultural heritage. Our region’s landscape is defined by farm fields surrounding our historic town centers. There is growing interest from residents in eating locally grown food, farm-to-table restaurants, and farmers markets. There is a growing interest from farmers in bringing customers to the farm, on-farm processing and sales, smaller acreage farming, and cultivating year-round markets for farm products.

**POLICIES:**

- The region should protect farmland, support farmers, connect farms to local markets, cultivate agri-tourism, and ensure access to locally grown food.
- Support agricultural innovation. Promote the region as a center for the development of new agricultural technologies and attract a new generation of farmers to the region.

**ACTIONS:**

<p>PROTECT FARMLAND</p>	<p>1) Support local efforts to identify and protect prime farmland. Support applications for funding to <b>acquire or purchase development rights</b> on priority farmlands.                  2) Collaborate with local land trusts and municipalities to provide <b>access to land for new farmers</b> and assist with succession planning for farmers who'd like to retire.</p>	<p>Litchfield Hills Greenprint Collaborative, Connecticut Farmland Trust, CT DEEP, CT DoA</p>
<p>SUPPORT FARM BUSINESSES</p>	<p>1) Provide and promote example <b>“farm friendly” zoning regulations</b> which define agriculture more broadly, provide farmers flexibility for ancillary uses on farms including processing, and allow for adequate signage to farms.                  2) Support the <b>Northwest Connecticut Food Hub</b> project which supports farmers by connecting them with larger and more consistent wholesale and niche markets for their farm products.                  3) Provide information to towns on <b>tax relief</b> mechanisms for farmers.                  4) Support <b>local agricultural commissions</b> in their efforts to assess the needs of local farmers, link new farmers to land, create “Know your farmer” brochures and events, consider pursuing zoning changes or right to farm ordinances.</p>	<p>Partners for Sustainable Healthy Communities, Upper Housatonic Valley National Heritage Area</p>

**4. GOAL: Strengthen our town centers and Main Streets**

Our village centers, downtowns, and “Main Streets” provide essential services to our residents and inform each town’s unique identity and sense of place. They are the heart of our communities. They also contain many small businesses and attract visitors which support other local businesses. Many visitors have loved our towns so much they have become residents. Retaining the vitality of our town centers and Main Streets is critical and requires sustained, coordinated efforts.

**POLICIES:**

- Promote additional housing development in town center areas to enhance the vitality of these centers including re-development of existing buildings, housing above commercial spaces, infill development, and new development on small lots.
- Support tourism marketing activities that draw visitors to our 21-town region.
- Foster and support ongoing activities on Main Streets that attract young visitors and residents to our downtowns and village center areas.
- Make town center areas more pedestrian friendly.
- Promote and enhance each town’s historic, cultural, arts, and recreational assets.
- Facilitate local place-making initiatives including coordinated, on-going activities on “Main Streets” , activating public spaces, increasing the town center’s attractiveness and uniqueness.

- Link our town centers with our outdoor recreational assets.

**ACTIONS:**

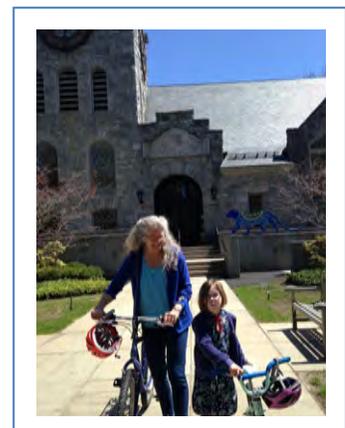

HOUSING	1) Work with local zoning commissions to provide them with "zoning best practices" that promote compact <b>mixed use (housing and commercial) village/town centers.</b>	Municipal planning and zoning commissions
TRANSPORTATION	1) Complete the <b>region’s Intermodal Transportation Center</b> in downtown Torrington including exploration of transit oriented development (TOD), rail access, and complete streets improvements in the area. 2) Create clear <b>pedestrian and/or bike connections between town centers and hike/bike trails</b> so that people hiking can support local businesses by eating, shopping, or staying in town. 3) Develop a model sidewalk ordinance and “complete streets” demonstration project for village centers/Main Streets to support and encourage <b>pedestrian friendly</b> centers.	Municipalities, NWCT Transit District, Upper Housatonic Valley National Heritage Area
TOURISM, small businesses, and placemaking	1) Support <b>tourism marketing</b> activities that draw visitors to our town centers and Main Streets. 2) Train local EDCs to conduct <b>annual business visits</b> to help retain/grow existing businesses. 3) Support on-going <b>placemaking activities</b> - regional facilitation to train Main Street programming volunteers (Work with local economic development commissions to coordinate and market Main Street/town center events- consider activities that attract all ages and create opportunities for social interactions.) 4) <b>Signage</b> to welcome people and direct people to shops, restaurants, historical sites, recreational opportunities	Municipal EDCs, CT Main Street Center, Upper Housatonic Valley National Heritage Area, NWCT Arts Council

**5. GOAL: Meet the needs of our older adult residents**

By the year 2025, it is predicted that 28% of our region’s population will be over 65 years old. According to a recent AARP study, a majority of older residents want to “age in place”. We need to make sure our communities meet the unique housing, transportation, recreation, civic engagement, health and safety needs of these residents.

**POLICIES:**

- Improve access to employment and volunteer opportunities for older adults.

- Promote housing that enables people to live safely, comfortably and independently for as long as possible. The vast majority of people 50-plus want to stay in their homes and communities for as long as possible.
- Improve transportation options for older adults to access medical appointment, shopping, and social and civic activities.
- Encourage town recreational events and activities that attract people of all ages- young, old, and in between.

**ACTIONS:**

JOBS	1) Facilitate the creation of links from municipal and regional websites to an updated list of <b>job openings</b> in the region. Promoted through senior centers, town newsletters, social media and other channels used by older adults.	NWCT Chamber of Commerce
HOUSING	1) Provide towns with “best practices” and toolkits on <b>accessory apartment</b> regulations and <b>shared housing</b> options. 2) Continue to support the efforts of local <b>affordable housing</b> organizations to create housing options for older adults in their towns through the Regional Housing Council including apartments in town centers. 3) Improve access to guides and resources to rehab homes for accessibility modifications and other livability improvements.	NWCT Regional Housing Council, municipal P&Z
TRANSPORTATION	1) Improve and extend <b>sidewalks</b> in town centers and downtowns to enhance walkability. 2) Better communicate <b>public transit</b> options to older adults and increase access to <b>town vans/buses</b> to access medical appointments, shopping, and group activities.	Municipalities, NW Transit District, Geer
RECREATION	1) Create/promote community exercise opportunities by encouraging <b>age-friendly gyms</b> and ADA accessible parks. 2) Design recreational activities for <b>inter-generational participation</b> .	Municipalities, local recreation commissions
CIVIC AND SOCIAL ENGAGEMENT	1) Provide towns with “best practices” and tools for matching older residents to town <b>volunteer opportunities</b> and recognizing their contributions. 2) Create and promote more opportunities for the town’s seniors and young people to come together (Bingo for all!)	Municipalities
HEALTH & SAFETY	1) Support NWCONNect's efforts to connect every home and business in the region to high speed <b>fiber optic broadband</b> and deploy a distributed mobile antenna system to enhance mobile coverage. High speed internet will allow new tele-health and home security services. Increased cell phone coverage will assist in the efforts of emergency service providers and caretakers. 2) Increase access to healthy local food by improving access to farmers markets, food shares, and community gardens.	NWCONNect, local farmers markets

## 6. GOAL: Continue to foster regional collaboration, resource and information sharing.

Eighty-five percent (85%) of regional plan survey respondents agreed that the region should foster collaboration and coordination between and among its town leaders, town board and commissions, non-profit and community based organizations in order to meet regional goals. NHCOG works to do this every day. We are lucky to have terrific partners in our member towns’ chief elected officials, local board and commission members that value and actively participate in regional collaboration and resource sharing. Our region’s non-profits and community based organizations, often faced with limited resources, have a similar history of partnering to share information and resources.

### ACTIONS:

<p>Collaboration and resource sharing between TOWNS</p>	<ol style="list-style-type: none"> <li>1) Hold <b>monthly meetings</b> of the region’s Chief Elected Officials (CEOs) to discuss issues in municipal management, oversee existing COG programs, and explore new opportunities for regional cooperation.</li> <li>2) Coordinate the <b>Public Works Equipment Cooperative</b>, sharing 10 pieces of equipment between 21 towns.</li> <li>3) Facilitate the cost-effective purchase of treated road salt, plow blades, crack sealing services, and road regulatory and warning signs for member towns through the <b>Northwest Hills Cooperative Purchase Program</b>.</li> <li>4) Convene other regional meetings as needed such as the annual “<b>Northwest Hills Legislative Forum</b>” with Area Legislators.</li> <li>5) Coordinate with regional Transportation Providers to improve <b>regional transportation coordination</b> and offerings.</li> </ol>	<p>Municipal CEO’s, public works, legislators, NWCT Transit District, Geer, Education Connection</p>
<p>Information and resource sharing between BOARDS and COMMISSIONS</p>	<ol style="list-style-type: none"> <li>1) Facilitate quarterly “<b>5th Thursdays</b>” forums for land use commission members to get local input on the development of regional plans and provide a forum for the sharing of information between towns.</li> <li>2) Organize and host <b>training workshops</b> for land use board/commission members in the region.</li> <li>3) Facilitate an annual <b>NWCT Economic Development Summit</b> for local EDC members in the NHCOG region to meet each other, hear guest speakers on topics of common interest, and provide input on CEDS update and implementation.</li> <li>4) Create a <b>checklist for towns updating their POCDs</b> to make it easier to incorporate required plan components including consistency with regional and state POCDs.</li> <li>5) Provide a shared <b>web-based toolbox</b> of case studies and example regulations to make it easier for local board and</li> </ol>	<p>Municipal planning, zoning, conservation, wetlands, and economic development boards and commissions</p>

	<p>commissions to consider and implement plan strategies.          6) Collect updated <b>demographic, economic, housing, and other land use related data</b> for each of our member towns and make it easily accessible to them for use in decision making and grant writing.</p>	
<p>Collaboration between NON-PROFIT PARTNERS</p>	<p>1) Provide technical assistance to the <b>Housatonic River Commission and Western CT Water Utility Coordinating Committee.</b>          2) Host quarterly meetings of the <b>NWCT Regional Housing Council.</b>          3) Continue active participation in the <b>Northwest Connecticut Economic Development Corporation</b> and implementation of the region’s CEDS (Comprehensive Economic Development Strategy)</p>	<p>NWCT EDC,          Chamber NWCT,          HVA and          Litchfield Hills          Greenprint,          Northwest          Conservation          District, NWCT          Arts Council,          Upper          Housatonic Valley          National          Heritage Area</p>

## V. Regional Conservation & Development Policy Maps

### How the maps will be used:

The maps on the following pages are regional policy maps. They will be used to assist NHCOG in its role to determine consistency of local or regional actions with the Regional Plan of Conservation and Development when such a determination is requested. As such the maps can be considered advisory in nature to municipalities when they update their municipal plans of conservation and development and/or consider local land use decisions.

### Conservation Policy Maps:

The “*Water Resources*” map shows drinking water watersheds, riparian buffers (100ft buffers from banks of significant streams) and wetland soils. Actions that occur in these areas should consider any negative impacts of the action on water resources and reduce or eliminate that impact.

The “*Farms and Forests*” map includes “Core forest” which shows contiguous forest habitats greater than 200 acres in size. These large contiguous forests provide many regional benefits including providing wildlife habitat, carbon storage, nutrient cycling, and water and air purification. The “priority farm fields” shows farmland greater than 50 acres containing prime farmland soils. It is important to protect these areas from development so that that the land remains available for agricultural use to ensure local availability of fresh farm products and help agriculture to remain an important part of the region’s economy. Actions that occur in these areas should consider any negative impacts of the action on core forests and prime farmland soils and reduce or eliminate that impact. Investments in conservation of these areas would be consistent with the Regional Plan.

### Regional Recreational Trail Network Map

This map is an appendix to the Plan and shows both current and proposed trails for hiking, walking, and biking in the region.

This map can be used to pursue investments in recreational trails that have regional significance in strengthening our existing trail network.

### Sustainable Growth Policy Map:

This map shows the areas in our region that are prioritized for actions and/or investments in development or growth related infrastructure. These are consistent with and taken from the State’s Plan of Conservation & Development Locational Guide Map. Here is the criteria we used for each and the associated policy:

**Regional Center**= downtown Torrington: investments in transit, sidewalks, water and sewer infrastructure and downtown development would be consistent with the Regional Plan.

**Primary Growth Area**= these areas have access to public water, sewer, and public transportation. Investments in supporting and/or expanding these services as needed would be consistent with the Regional Plan.

 **Balanced Growth Area**= these areas have access to public or community water and/or sewer and may also be located in areas that meet conservation related criteria. Therefore actions in these areas should consider the impact on both natural resources and growth related needs.

 **Village Growth Areas**= these areas were determined locally and represent the traditional village centers of our rural towns. In most cases they are not served by public water and/or sewer. Investments in these areas that would be consistent with the Regional Plan include infill housing, sidewalks, bikeways, and “Main Street” improvements. Any action or investment would take into consideration ways to strengthen or improve the traditional village character of these areas.

 **Rural Areas**= these areas are appropriate for low density residential use on parcels large enough to accommodate on-site wastewater treatment and wells. Many of these areas also contain water resources, core forests and/or priority farm fields which are conservation priorities.

Notes on Data Layers:  
 "Core Forest" was determined by The Litchfield Hills Greenprint using the Center for Land-use Education and Research land cover data developed from satellite imagery. Contiguous forest  $\geq 200$  acres and  $\leq 300$  feet from developed areas were selected.

"Priority Farm Fields" were determined by The Litchfield Hills Greenprint, based on aerial imagery and USDA soils of prime or statewide importance for farmland and parcels  $\geq 50$  acres (From Town Assessor data) Parcels that contained at least 10% of farm fields and 25% of USDA designated farmland soils were selected to create the Priority Farm Fields dataset.

## VI. Consistency with State and Local Plans of Conservation & Development

### State Plan of Conservation & Development

This plan is consistent with the six growth management principles in the State Plan:

- Redevelop and revitalize regional centers and areas with existing or currently planned physical infrastructure.
- Expand housing opportunities and design choices to accommodate a variety of household types and needs.
- Concentrate development around transportation nodes and along major transportation corridors to support the viability of transportation options.
- Conserve and restore the natural environment, cultural and historical resources, and traditional rural lands.
- Protect and ensure the integrity of environmental assets critical to public health
- Promote integrated planning across all levels of government to address issues on a statewide, regional, and local basis.

This plan is also consistent with and support the following regional plans:

Regional  
Transportation  
Plan

Regional Hazard  
Mitigation Plans

Comprehensive  
Economic

### Local Plans of Conservation & Development

NHCOG reviewed each of its member municipality's plan of conservation and development (POCD) and met with each member town's planning and zoning commission during the development of this Plan. During the draft plan review process, each town was asked to review the draft Plan and comment on its consistency with the local POCD. This process has assured consistency of this Plan with local POCDs.
