Hello,

I thought the report was very interesting. Not at all sure that the data points are accurate but nevertheless it was informative.

Just want to say that I object to the River Road development project because I object to sprawl. Whether the development was for luxury housing or affordable housing or something in between, I still object to sprawl. If 'new build' funds are ever found I strongly support building in the village. The current town garage space is perfect. Walkability, Town water, electricity already in place, so much less infrastructure expense.

I also reject the ridiculous narrative that objecting to this development makes one inherently anti affordable housing. My disabled sister lives in affordable housing in NYC, and I thank the stars for that, every day.

Best,
Noelle Lamuniere
